WORKSHOP REVOLUTION

In 1899, HELLA was founded as “Westfälische Metall Industrie AG” in Lippstadt, Germany. What started out small has developed over the decades into one of the world’s leading automotive suppliers. HELLA is now an established player on the global market with innovative lighting technology, electronics and products and services in the aftermarket and special original equipment sectors.

Additionally, 60 years ago the success story of Hella Gutmann began in a small workshop, that has now become a global player with unmatched expertise in diagnostics and workshop equipment.

Today we proudly serve as the driving force behind workshops, providing quality solutions to elevate your repairs:

- We believe in providing added value to workshops and wholesalers and enabling their sustainability by offering spare parts for today’s and tomorrow’s challenges
- We create solutions
- We offer 360° solutions combining diagnostics, spare parts, services, tooling, support and digital information from classic vehicles to future mobility-solutions.

HELLA, PIONEER IN LIGHTING TECHNOLOGY

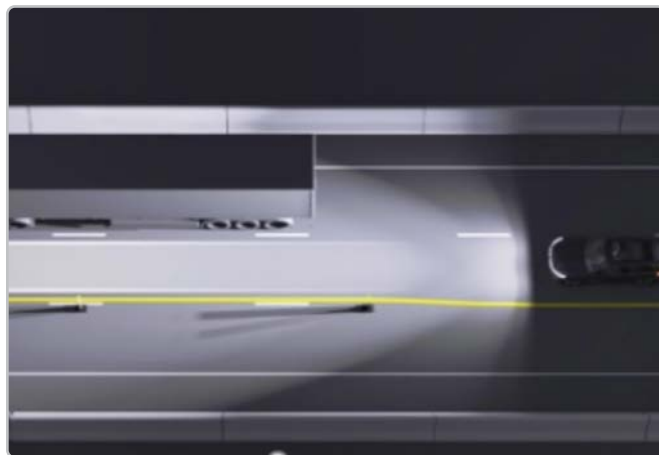

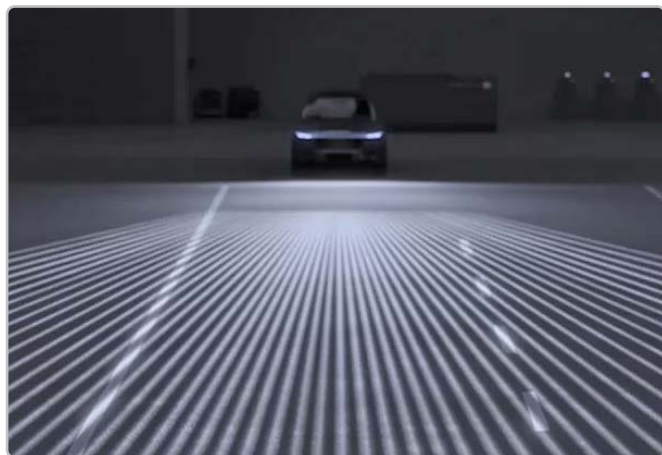

HELLA is a leader in the independent aftermarket for vehicle-specific lighting with a wide market coverage.

We have been developing vehicle lighting for more than 120 years and our innovative strength means we are continuously improving and expanding our range, resulting in increased safety for drivers.

OE EXPERTISE FOR THE INDEPENDENT AFTERMARKET

With a broad OE quality aftermarket range, HELLA is the leader in the European market. Our products for the independent aftermarket have the same quality levels offered in series production; produced in the same factories, with the same machines and same rigorous testing procedures.

When it comes to new OE technologies HELLA is at the forefront. Our high definition, digital intelligent lighting i.e. the SSL | HD provides unique lighting features such as glare-free high beam, optical lane assist, predictive road illumination and icon projection.

FOR LIGHTING TRUST THE EXPERTS

HELLA is a partner of renowned, international automotive manufacturers across passenger cars, light commercial vehicles and trucks and we transfer this OE know-how directly to the independent aftermarket. Our vehicle specific lighting includes:

HEADLAMPS

FOG LAMPS

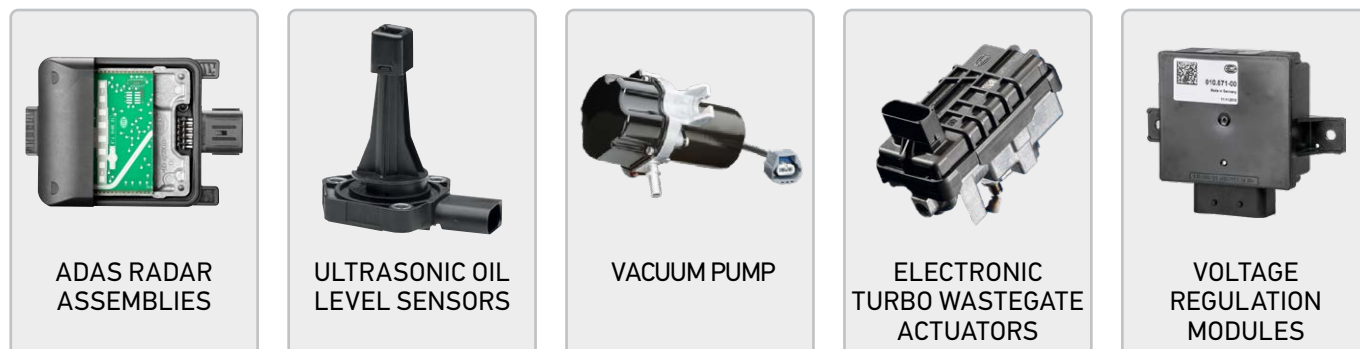

REAR LAMPS

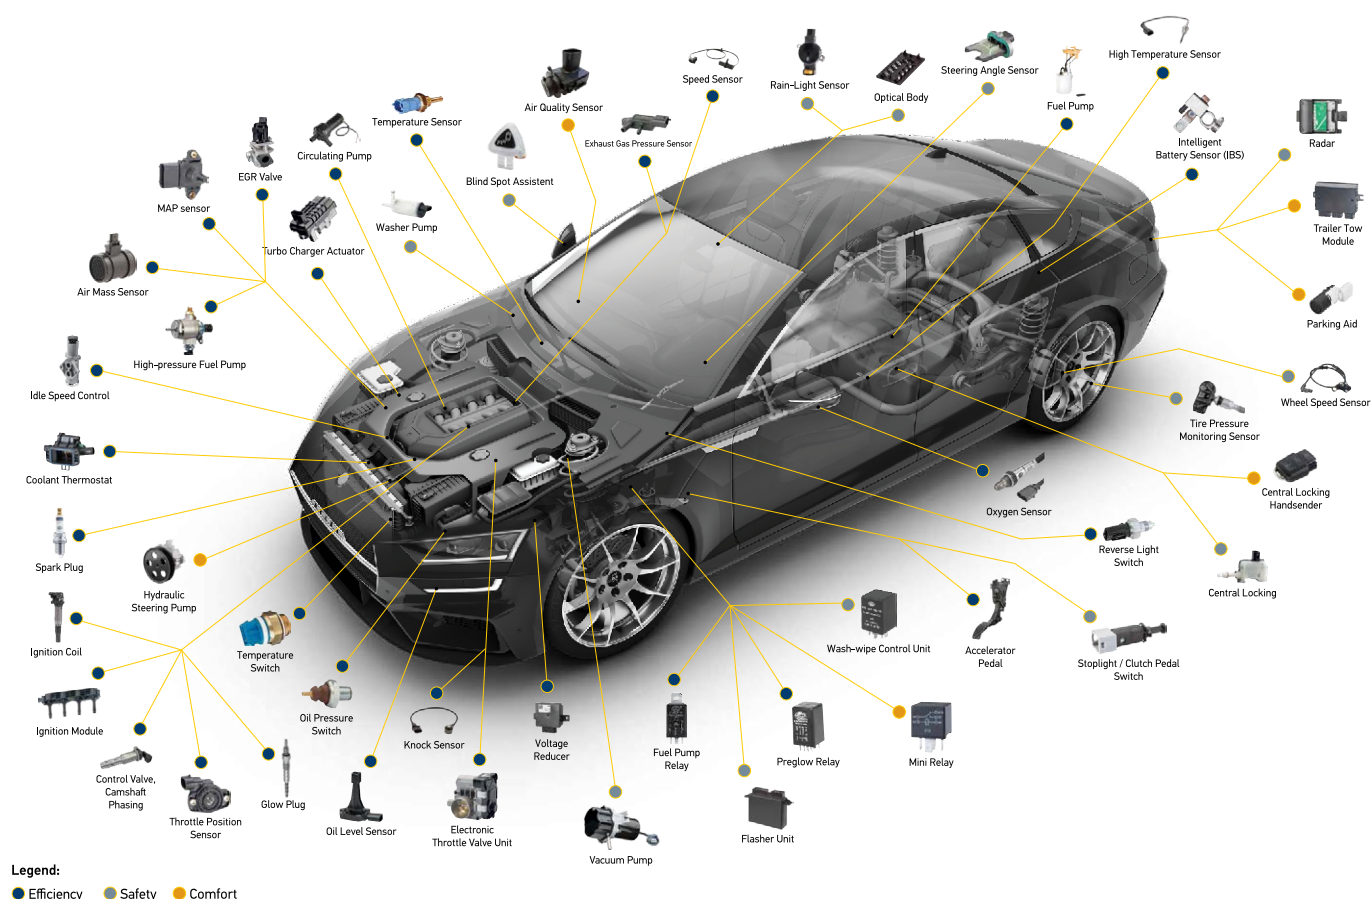

HELLA - ELECTRONICS FROM ONE OF THE WORLD'S LEADING OEMS

HELLA is recognised as one of the leaders in innovative electronics manufacturing for leading vehicle OEMs. Some of the following components have built HELLA's reputation as a technology leader in vehicle electronics:

HELLA - ELECTRONIC REPLACEMENT PARTS FOR THE AFTERMARKET

Bringing our OE expertise of innovative, quality electronic products to the aftermarket, HELLA offers a comprehensive range of vehicle replacement electronics to keep your vehicle running reliably and trouble free. HELLA can offer the electronic parts below for a large selection of vehicles:

HELLA AFTERMARKET CATALOGUE

PREMIUM BRAKING PERFORMANCE

HELLA brakes deliver world-class quality and trusted performance in a comprehensive range of replacement braking components. Formerly known as HELLA PAGID, the brand is now unified under the HELLA name, continuing to provide the precision and reliability workshops and drivers demand.

HELLA brakes are supported by HELLA Australia's expert local team, ensuring the right fit and performance every time.

EUROPEAN BRAKES FOR EUROPEAN MAKES

From city cars to supercars, HELLA Brakes are designed to meet the exacting standards of European makes. Our range reflects the same high standards found in original equipment, delivering the performance and safety European vehicles were built for.

Covering 99% of European passenger cars and light commercial vehicles, HELLA brakes are your go-to solution for premium braking, driven by innovation and backed by a global leader in automotive technology.

WORKSHOP'S FRIEND

Benefit from HELLA technical knowledge and support

Trust HELLA to get the job done.

HELLA GUTMANN – SMARTER SOLUTIONS FOR SAFER VEHICLES

With over 60 years of experience, Hella Gutmann has built a reputation for delivering reliable solutions firmly rooted in the workshop. With cutting edge European quality, supported locally, Hella Gutmann diagnostic solutions cover 88% of the Australian car parc and 95% of top 10 car brands.

We also deliver expert service and solutions that complement HELLA's wide range of lighting and electronic products, making it the smart choice for reliable servicing.

Who better to service ADAS systems than the people who develop them.

ADAS require accurate calibration for driver and passenger safety in modern vehicles:

- Adaptive Cruise Control – ACC
- Autonomous Emergency Braking - AEB
- Lane Keep Assist or Lane Departure Warning
- Reverse assist or all-round vision camera system
- Night vision assist
- Adaptive lighting systems
- Traffic sign recognition
- Blind spot monitoring
- Glare free high beam
- Intersection assist
- Rear cross traffic alert
- Pedestrian detection
- Intelligent speed assist
- Attentiveness Monitoring - Eye-tracking
- Driver drowsiness detection

DIAGNOSE. CALIBRATE. ILLUMINATE

Hella Gutmann's comprehensive product portfolio covers advanced vehicle diagnostics devices, intelligent testing and adjustment tools, and excellent services for the independent workshop.

DIAGNOSTIC SOLUTIONS

From high-tech measuring systems to compact mobile devices, Hella Gutmann offers tailored tools for every diagnostic need.

mega macs PC SE

Turn your existing PC into a full diagnostic powerhouse.

mega macs X

Flexible and future-ready.
Adapts to workshop needs as you grow.

mega macs S 20

Compact, entry-level solution.
Android compatible for fast and simple diagnostics including calibrations.

CALIBRATION TOOLS

Our professional calibration solutions support calibration of radar, lidar, and camera-based systems for a wide range of vehicles.

CSC-Tool SE

Precise, modular workshop solution for static ADAS calibration across a wide range of vehicles.

CSC-Mobile

Mobile and lightweight design.
Ideal for mobile service providers and space-conscious workshops.

X 20

Newly developed 3D Camera Technology. Models to be released soon.

HEADLAMP ADJUSTMENT

Hella Gutmann's beam setters provide workshops with the tools to accurately measure and adjust headlamp alignment, ensuring optimal road visibility and compliance with legal standards.

SEG V

Fast, accurate headlamp adjustment for halogen, xenon, LED, and matrix lights.

SEG IV DLLX

Enhances headlamp alignment with integrated laser technology for ultimate positioning

SEG IV

Durable and cost-effective solution for precise headlamp alignments.
